

TAKE ACTION TO IMPROVE YOUR HEART HEALTH

The **YMCA's Blood Pressure Self-Monitoring Program** is designed to help adults with hypertension lower and manage their blood pressure. The program focuses on regular self-monitoring of one's blood pressure over 16 weeks using proper measuring techniques, **one-on-one or group based consultations** with a trained **Healthy Heart Ambassador**, support and nutrition education for better blood pressure management. **Offered both in person and virtually.**

PROGRAM GOALS

- Reduction in blood pressure
- Better blood pressure management
- Increased awareness of triggers that elevate blood pressure
- Enhanced knowledge to develop healthier eating habits

WHO QUALIFIES?

- Be at least 18 years old
- Diagnosed with high blood pressure
- Not have experienced a recent cardiac event
- Not have atrial fibrillation or other arrhythmias
- Not be at risk for lymphedema

KNOW YOUR NUMBERS

During a heart check up, your doctor takes a careful look at your "numbers," including your blood sugar, cholesterol, blood pressure and more. **Knowing your numbers is an important part of keeping your heart healthy.** It can help you and your doctor know your risks and mark the progress you're making toward a healthier you.

YMCA'S BLOOD PRESSURE SELF-MONITORING PROGRAM

A HEALTH INTERVENTION PROGRAM AT THE GRANITE YMCA

www.graniteymca.org

PHYSICAL WELLNESS

While high blood pressure and heart disease are serious conditions, the good news is a healthy heart is an achievable goal through lifestyle changes such as lowering sodium intake, eating healthier, and getting more physical activity.

According to the CDC, the Surgeon General recommends 2 1/2 hours of moderate-intensity exercise every week for adults. This includes activities like brisk walking or bicycling, to help lower risk for cardiovascular disease.

EDUCATION & OUTREACH

This program helps adults with hypertension achieve the goal of lowering and managing their blood pressure through increased awareness of triggers that elevate it. In this 4-month evidence-based program participants will:

- **Attend at least two 10-minute personalized consultations per month with our trained Healthy Heart Ambassador**
- **Learn measuring techniques and record blood pressure at home to share during consultations**
- **Attend monthly nutrition education workshops to develop healthier eating habits**

GROUP SUPPORT

Trained Healthy Heart Ambassadors (HHAs) are an integral part of the YMCA's Blood Pressure Self-Monitoring Program. The role of HHAs is to support participants in their journey toward improved health.

HHAs conduct a variety of activities in a group-based setting during the 4-month program. Participants find their own path to better blood pressure management while being supported by HHAs' guidance and encouragement.
