

WEARING A MASK WHILE AT THE Y

To help ensure the safety of our members and staff at The Granite YMCA, we have established a formal mask policy.

- Masks are REQUIRED when not actively working out or participating in a program. A mask must be worn during the health screening, while walking through the branch, in the locker rooms, on the pool deck and when leaving your workout/program space.
- Masks may be REMOVED when you are ready to begin your workout, as long as you maintain a 6' distance from others.

At The Granite YMCA, we are doing our part to ensure everyone in our facilities can be free to take their mask off when working out by:

- Limiting capacity in our group ex class to ensure that there is appropriate amount of space for a member to complete the class and not get too close to another member or staff.
- Limiting capacity in our Fitness Centers, and altered the layout of equipment to provide adequate space for members to social distance while working out.
- Limiting capacity in our Pools to ensure members can space appropriately either by stopping at alternate ends of the pool for lap breaks. or spread out adequately for a Water Exercise Class and Open Swim.
- Instituting a RESERVATION SYSTEM for members to be sure to get the workout of their choice, during the day/time of their choice without fear of being turned away due to limited capacity.

We are adhering to these guidelines as they are a requirement of being allowed to operate our facility as stated by the Governor's Task Force under Stay At Home 2.0 which is strongly guided by CDC recommendations. As the situation continues to unfold, and as a the Governor's council releases new operating guidelines, our policies will adapt to meet the current need. We will communicate any policy changes with our members through emails, social media, on our website, and through signage located within our facilities.

We appreciate your effort and understanding! If you have any questions, please contact the welcome center.
